## Executive Summary

- The government of Rwanda has prioritized ICT policy for inducing FDI and self-branding. Many western countries praise Rwanda as “The Miracle in Africa”
- However, ICT policy in Rwanda is not as successful as advertised given the fact that ICT sector does NOT sufficiently generate GDP and job opportunities.
- To achieve economic growth and create decent job opportunities, either adjustments of its strategy or streamlining its tactic is imperative.

# Topics

1. Introduction of Rwanda's ICT Policy
2. Design & Implementation of Rwanda's ICT Policy
3. Evaluation of Rwanda's ICT Policy
4. Implications of Rwanda's ICT Policy
5. References

## Introduction -How Rwanda's ICT policy looks like?-

Rwanda is regarded as an unique African country that leverages ICT for development while struggling with the legacy of the 1994 genocide

Drone

Urbanization

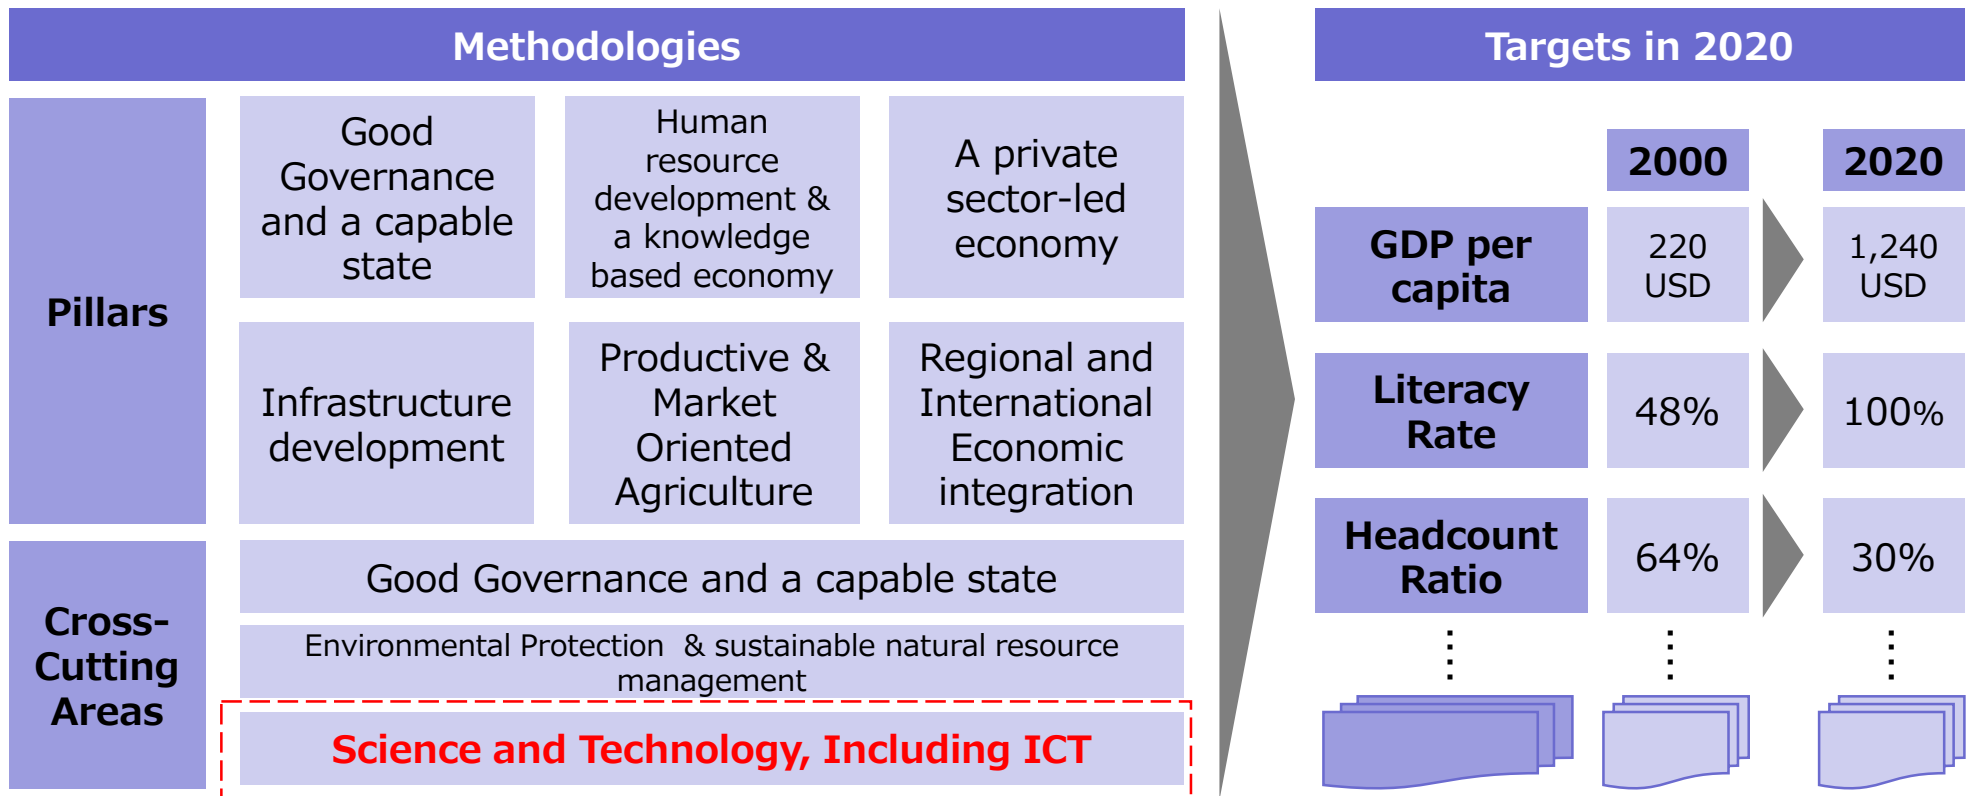

Edu-Tec

# ICT policy in National Development Strategy

Rwanda incorporates ICT policy into a package of policies in 2000 called "VISION2020", a development blueprint aiming at transforming the country into a middle-income country

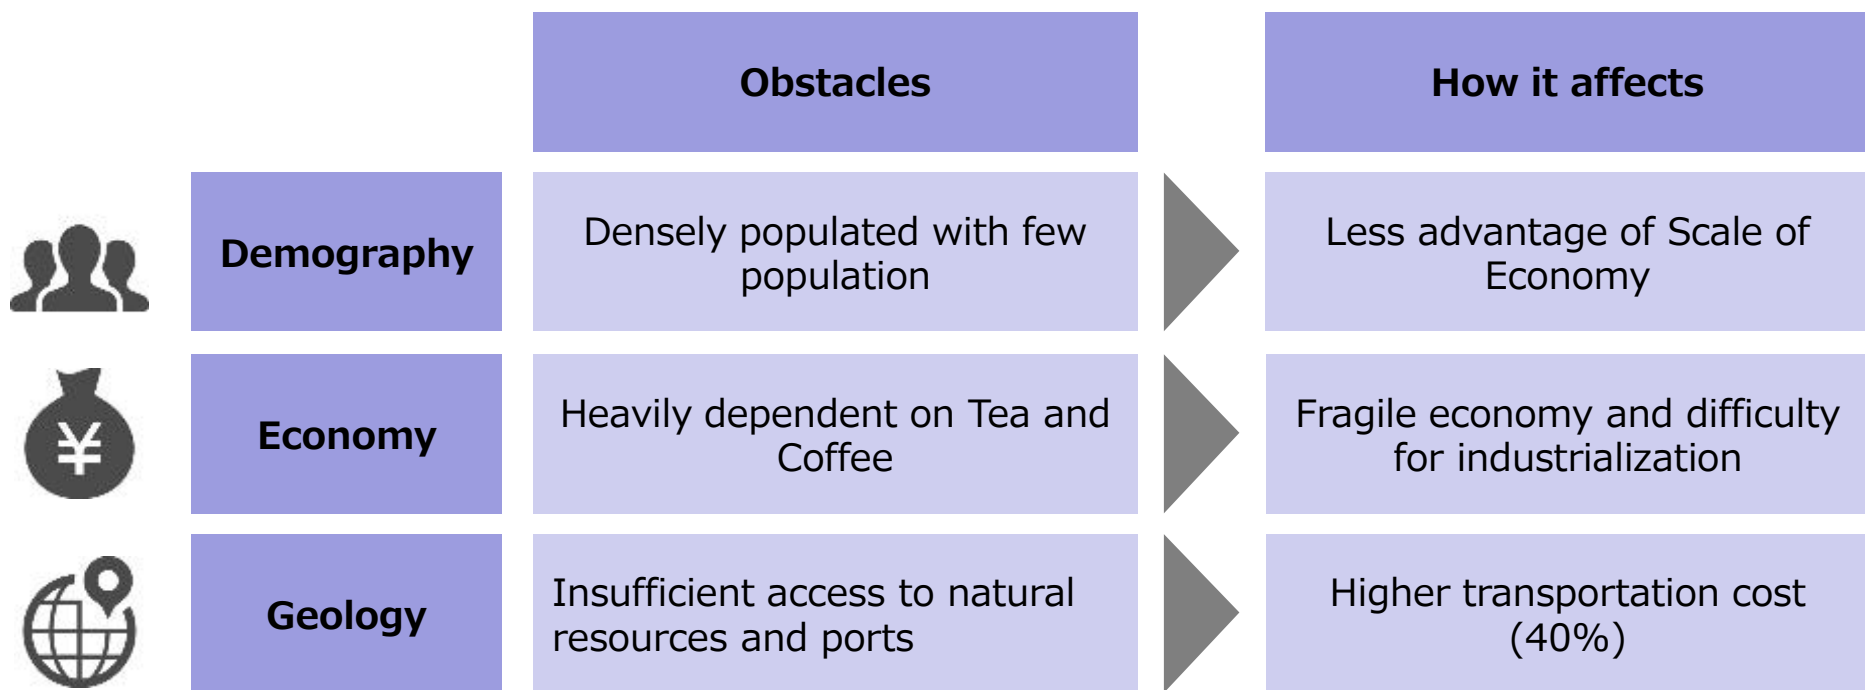

## Conceptual Image of VISION2020

Notes:  
• X

## Why ICT?

Demographic, Economic, and Geological conditions led Rwandan Government to prioritize ICT policy.

Notes:

- X

# Topics

2. Design & Implementation of Rwanda's ICT Policy
3. Evaluation of Rwanda's ICT Policy
4. Implications of Rwanda's ICT Policy
5. References

# Implementation

Rwandan Gov. launched National Information Communications Infrastructure(NICI) policy to realize full digitalization in four 5 year stages.

## Conceptual Image of NICI Policy

	<b>NICI I (2000-2005)</b>	<b>NICI II (2006-2010)</b>	<b>NICI III (2011-2015)</b>	<b>NICI IV (2016-2020)</b>
<b>Objectives</b>	Groundwork of ICT sector	ICT Infrastructure	Service Delivery	knowledge-based economy
<b>Goals</b>	To build the foundation and create an enabling environment for ICT development	To develop and deploy world class ICT infrastructure	To accelerate service development through ICT	To consolidate the NICI process towards achieving a middle-income country status
<b>Primary Project</b>	Opening telecommunication market	nationwide internet 4G fibers	"One Laptop per One Child" program	Private sector and community development

	NICI I (2000-2005)	NICI II (2006-2010)	NICI III (2011-2015)	NICI IV (2016-2020)
<b>Objectives</b>	Groundwork of ICT sector	ICT Infrastructure	Service Delivery	knowledge-based economy
<b>Goals</b>	To build the foundation and create an enabling environment for ICT development	To develop and deploy world class ICT infrastructure	To accelerate service development through ICT	To consolidate the NICI process towards achieving a middle-income country status
<b>Primary Project</b>	Opening telecommunication market	Set up of Data Centre, nationwide internet 4G fibers	"One Laptop per One Child" program	Private sector and community development

# Groundwork of ICT Infrastructure(NICI I )

As one of the primary projects of NICI I , the Gov. of Rwanda created telecommunication market as a basement for following ICT development to come. From 2000 to 2020, internet penetration rate rose from 0% to 28% and internet service providers rose from 2 to 12.

Internet penetration rate

	NICI I (2000-2005)	NICI II (2006-2010)	NICI III (2011-2015)	NICI IV (2016-2020)
<b>Objectives</b>	Groundwork of ICT sector	ICT Infrastructure	Service Delivery	knowledge-based economy
<b>Goals</b>	To build the foundation and create an enabling environment for ICT development	To develop and deploy world class ICT infrastructure	To accelerate service development through ICT	To consolidate the NICI process towards achieving a middle-income country status
<b>Primary Project</b>	Opening telecommunication market	Set up of Data Centre, nationwide internet 4G fiberf	"One Laptop per One Child" program	Private sector and community development

## Development of ICT Infrastructure(NICI II)

As one of the primary projects of NICI II, Data center was build in the capital city Kigali and nationwide 4G internet fiber was developed.

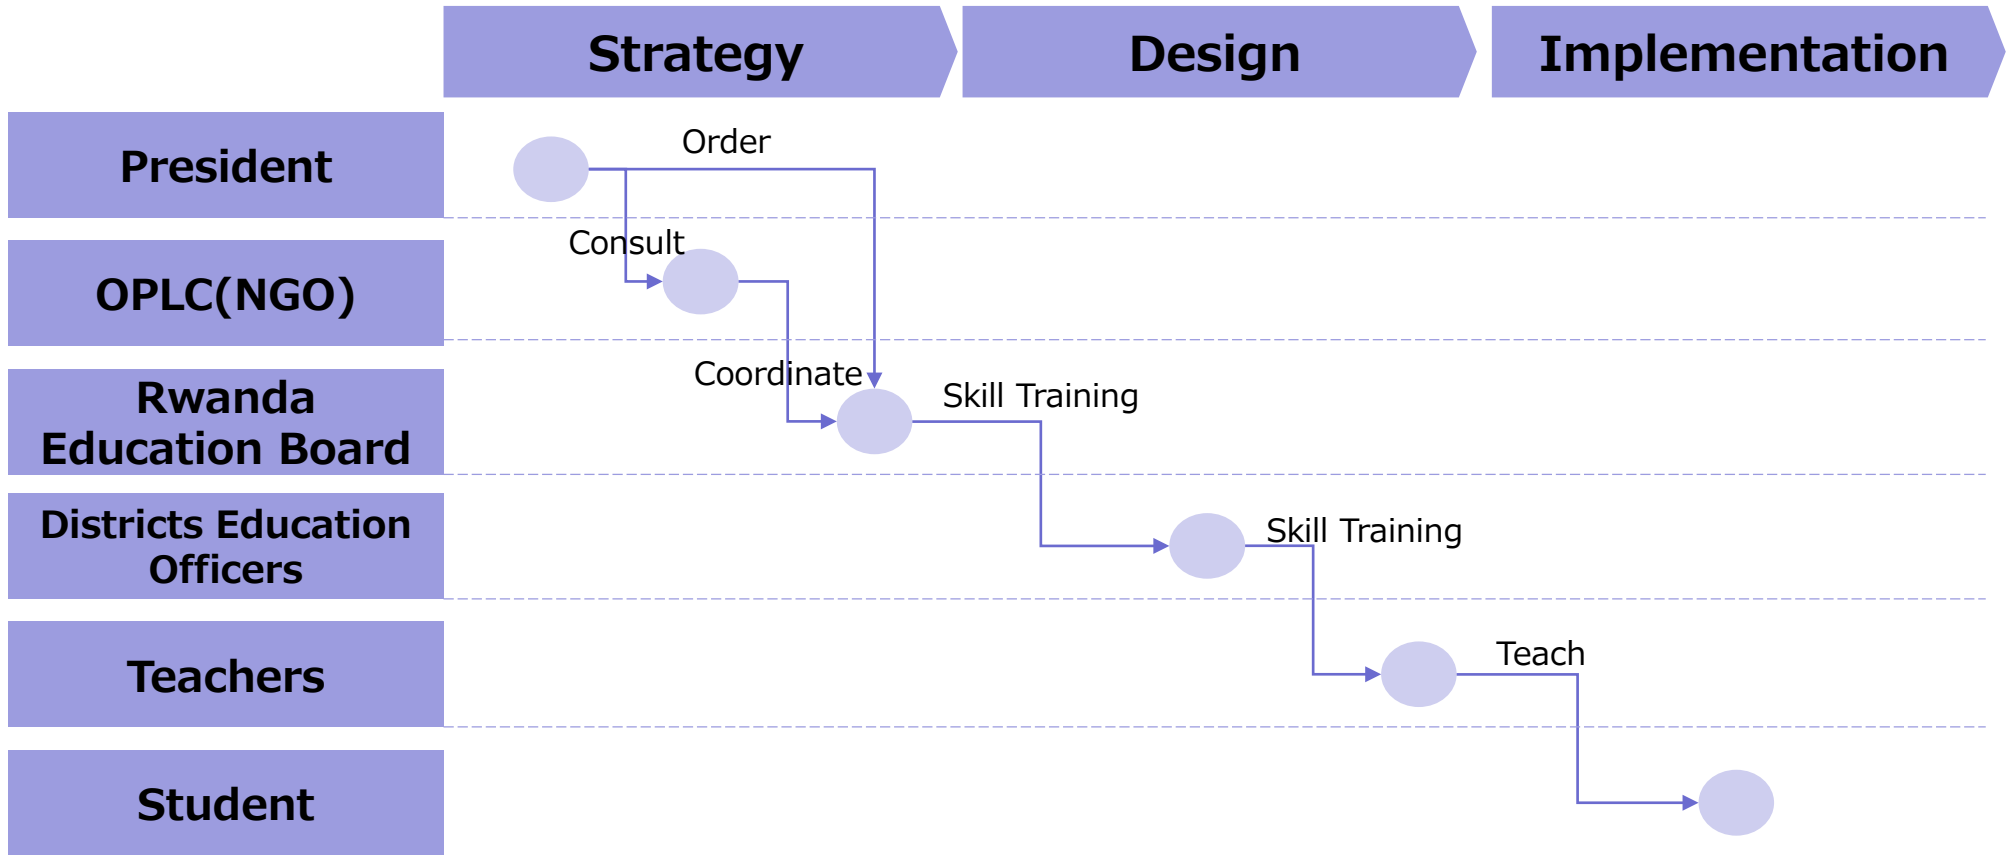

### 4G expansion rate

	NICI I (2000-2005)	NICI II (2006-2010)	NICI III (2011-2015)	NICI IV (2016-2020)
<b>Objectives</b>	Groundwork of ICT sector	ICT Infrastructure	Service Delivery	knowledge-based economy
<b>Goals</b>	To build the foundation and create an enabling environment for ICT development	To develop and deploy world class ICT infrastructure	To accelerate service development through ICT	To consolidate the NICI process towards achieving a middle-income country status
<b>Primary Project</b>	Opening telecommunication market	Set up of Data Centre, nationwide internet 4G fiber	"One Laptop per One Child" program	Private sector and community development

# "One Laptop Per Child" Project (NICI III)

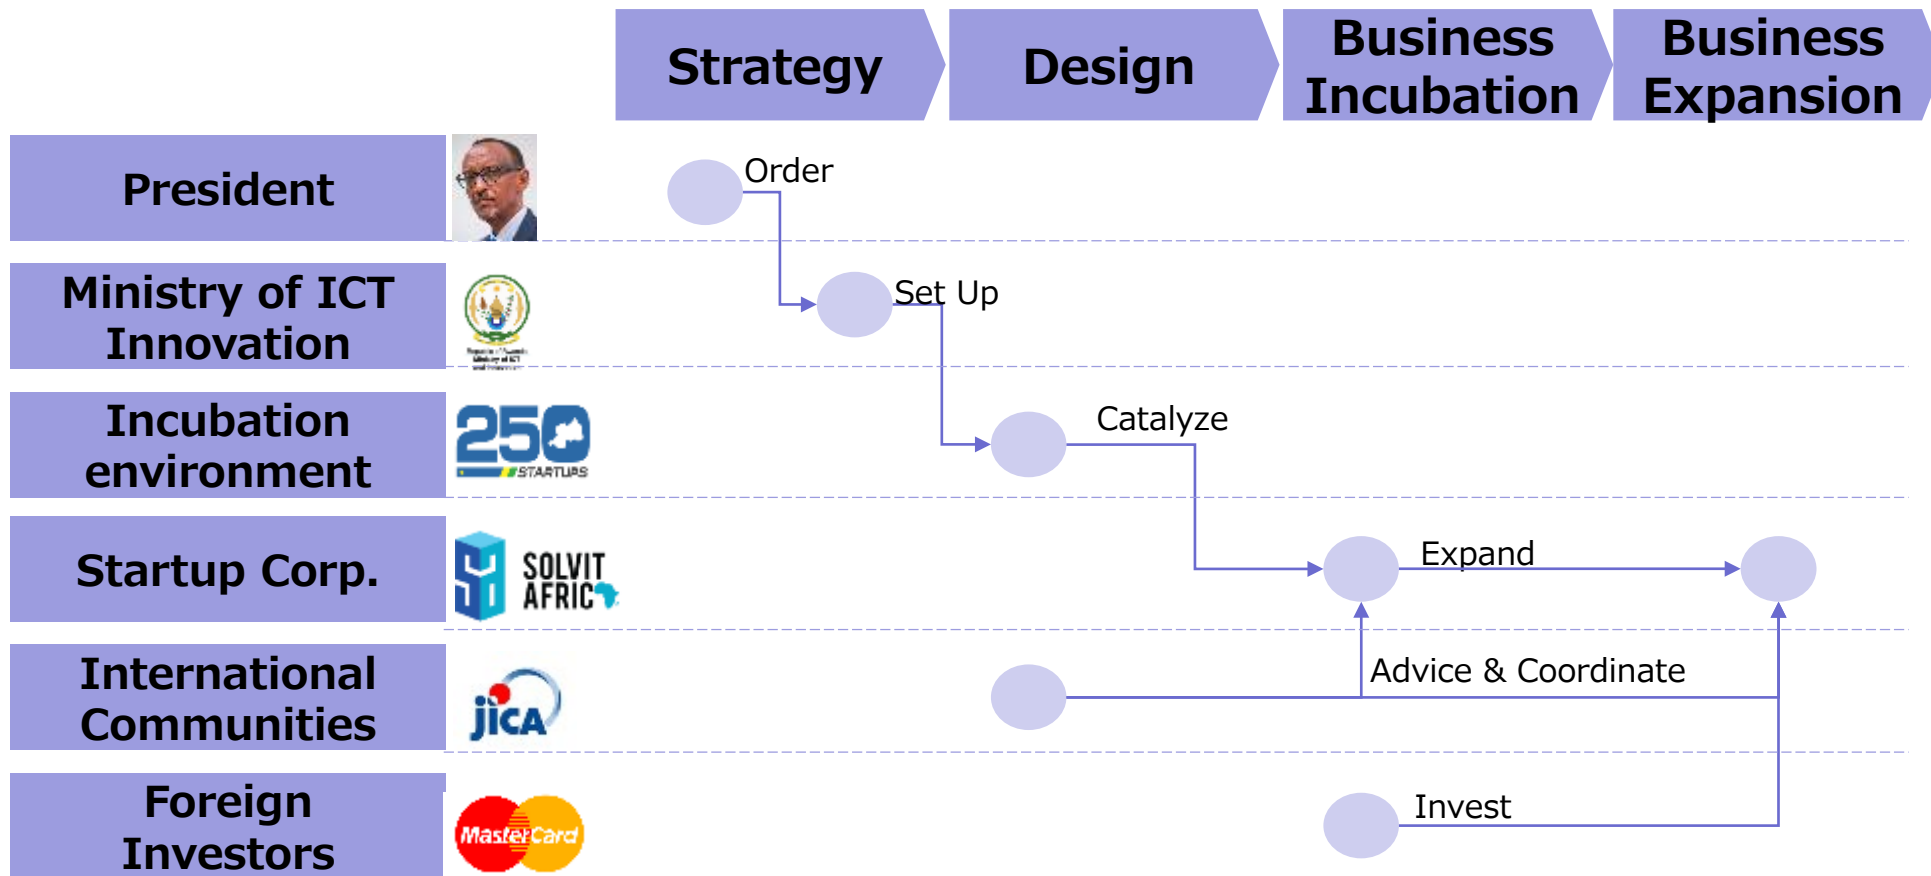

As one of the primary projects of NICI III, One Laptop Per Child(OLPC) was implemented to enable Primary school students an early access to. As a result, 267,000 laptops have been deployed to over 900 schools

	NICI I (2000-2005)	NICI II (2006-2010)	NICI III (2011-2015)	NICI IV (2016-2020)
Objectives	Groundwork of ICT sector	ICT Infrastructure	Service Delivery	knowledge-based economy
Goals	To build the foundation and create an enabling environment for ICT development	To develop and deploy world class ICT infrastructure	To accelerate service development through ICT	To consolidate the NICI process towards achieving a middle-income country status
Primary Project	Opening telecommunication market	Set up of Data Centre, nationwide internet 4G fiber	"One Laptop per One Child" program	Private sector and community development

# Business Acceleration Overview (NICI IV)

NICI IV attempted to create knowledge-based economy through empowering entrepreneurs. As a result, more than 40 startup companies were created.

# Topics

## Evaluation of Achievements

Promotion of ICT policy did not contribute to meeting many of provisioned KPIs

### VISION2020's ICT-related KPIs

	Situation in 2000	Target in 2020	Achievement in 2020	Evaluation
<b>GDP per capita</b>	220 USD	1,240 USD	797 USD	×
<b>GINI Index</b>	48.5	35	43(2016)	×
<b>Electronic payment transaction</b>	0.3%	75%	27%	×
<b>Access to electricity</b>	6.2%	35%	47%	○
<b>Internet Penetration Rate</b>	0.1%	50%	27%	×
<b>Mobile Subscription Rate</b>	0.5%	60%	82%	○
<b>Urban Population Rate</b>	15%	30%	17%	×

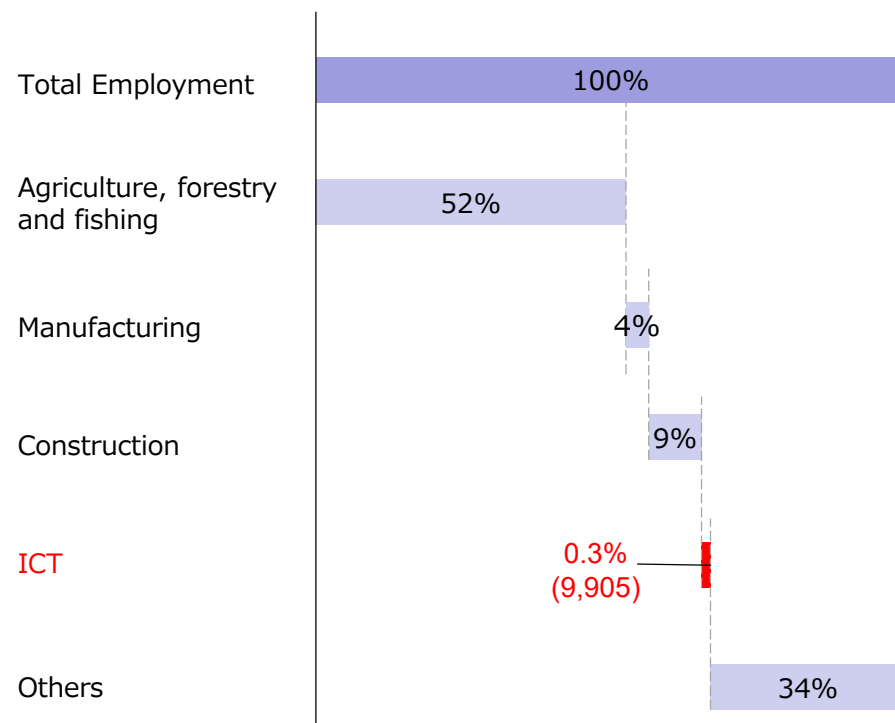

# Evaluation of Achievements (Cont'd)

Rwanda's ICT sector neither contribute to GDP nor create job opportunities.

Proportion of ICT Sector accounting for Total GDP

Proportion of Employment by Sector(2021)

# Obstacles

Different aspects stretching from strategy, preconditions, and business skills, dampen Rwanda's ICT policy

	Problems	Issues
<b>Strategy</b>	Feasibility of job creation	It might be better to prioritize other domain which could create more job opportunities
<b>Design &amp; Blueprint</b>	Non-Decent IT Infrastructure	Low Internet Penetration Rate
		Limited Awareness of ICT's benefits
<b>Implementation</b>	Low Survival rate of ICT Startups	Issue with Customer acquisition
		Issue with Financial management

# Topics

1. Introduction of Rwanda's ICT Policy
2. Design & Implementation of Rwanda's ICT Policy
3. Evaluation of Rwanda's ICT Policy
4. Implications of Rwanda's ICT Policy
5. References

# Implications

Implications from Rwanda's ICT policy imply the importance of grounded and inclusive development policy

Theme	Implications
<p>1</p>  <p><b>Strategy</b></p>	<p>Although DX sounds arresting, inclusive economic growth cannot be attained when a majority of citizens engage with primary sector in rural area with inadequate infrastructure.</p>
<p>2</p>  <p><b>Job Creation</b></p>	<p>Instead of a leap-frog approach, incremental and realistic approach may be necessary to generate decent employments, because highly digitalized-business takes lots of time and investments</p>
<p>3</p>  <p><b>Monetization</b></p>	<p>Comprehensive HR development approach is imperative because being knowledgeable in ICT and operating &amp; expanding business require different skills.</p>
